

SPECIFICATION AMENDMENTS

Page 2, lines 16-21:

Preferably the grid is visible with to the human eye as well as being radiopaque. The covering is preferably made of a sterile plastic material and includes a Cartesian coordinate radiopaque grid though polar and other coordinate systems may be used. As shown in [[the]] Figure 1, the Cartesian coordinate grid may include X and Y axes visible as solid lines, and may further include less prominent increment markings, such as one centimeter.
